100 mm ABS PLASTIC 3 GANG CUBE MOULD (EXTRUDED TYPE)

Standard: EN 12390-1, ASTM C39/C192, AASHTO T23/T126, BS 1881:108

Making Concrete Specimens

These one-piece 3 gang moulds, made from new ABS plastic, strong, light weight, underformable, resistant to vibration shocks and wear, do not require mounting and dismounting operations, thus saving time and labour. The specimen is expelled from the mould by compressed air or water. They just require a simple clean and demould oiling before being ready for use again continuously.

Technical Specifications :

Model Number	NL 4014 P / 043B
Approx. Weight	0.9 kg
Dimension	134 x 340 x 117 mm (LxWxH)
