

HIGH DENSITY PLASTIC CUBE MOULD

Standard: EN 12390-1, ASTM C39, C192

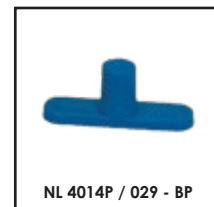

Making Concrete Specimens

One-piece moulds, made from hard plastic, strong, light, under formable; resistant to vibration shocks and wear, don't require mounting and dismounting operations, thus saving time and labour.

The specimen is expelled from the mould by compressed air or water. They just require a simple clean and demould oiling before being ready for use again for many times.

Technical Specifications :

Model Number	NL 4014 P / 029	NL 4014 P / 055
Dimension (mm)	200 (L) X 200 (W) X 170 (H)	150 (L) X 150(W) X 20 (H)
Specimen Size (mm)	150	100
Approx. Weight	1.8 kg	1.3 kg

Optional Accessories :

Model Number	Accessories Description
NL 4014P / 029 - AG	High Density Plastic Cube Mould Air Gun
NL 4014P / 029 - BP	High Density Plastic Cube Mould Base Plug.
